DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a motion activated speaker, classified in class 340, subclass 942.
- II. Claims 7-9, drawn to a 3-light alternately activated lamp, classified in class 340, subclass 815.45.
- III. Claim 10, drawn to a signboard with various road signs, classified in class 340, subclass 907.
- IV. Claims 11-13, drawn to a parking meter system, classified in 701, subclass 13.
- V. Claims 14-18, drawn to a railroad gate system, classified in 340, subclass 928.
- VI. Claim 19, drawn to a gas pump control and payment system classified in 705, subclass 413.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

Art Unit: 2632

In the instant case the different inventions are unrelated because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
